A Note to Authors Regarding Voluntary Page Charges.

1. Publication of significant technical papers insures that the ideas contained therein are available to a wide and appreciative audience. The IEEE, as a professional organization, is committed to produce and disseminate the highest quality technical literature as one of its primary functions. IEEE publications have world-wide acceptance as premier sources of significant information in the various technical fields. Authors and their institutions likewise recognize the preeminence of IEEE publications. Many organizations honor the importance of publications by their staff members and thus allocate funds for the dissemination of information. Alternatively, authors may have other sources of funds to help promote publication of their works.

As publication expenses continue to rise, the **IEEE Engineering in Medicine & Biology Society** has instituted a system of voluntary page charges to help defray some of these costs. If you have such funds available, our standard rate is \$110 per page. For this payment, you will receive 100 black & white reprints of your article at no charge. We estimate that your article will be approximately _____ pages long, hence a voluntary page charge of \$_____ (The actual number of pages upon publication might be slightly different because of final sizing and insertion of illustrations.) Please note that you will be billed based upon the above estimated number of pages.

If you are able to subscribe to this option, please indicate your acceptance below and kindly fill in the attached Order Form. An invoice will be issued and the 100 free reprints sent to you after publication.

I accept the obligation of \$_____ for voluntary page charges.

Name _____ Signature _____

Date _____

(continued)

2. Additional copies of the reprints are available at the prices listed on the enclosed Order Form.

3. Each senior author receives three copies of the publication plus three copies for each co-author of the article. All copies are shipped to the senior author. Often, authors (or their institutions) want additional copies of the complete publication. This is particularly appropriate where the issue is devoted to a theme topic, which makes it a particularly valuable reference for years to come.

The prices for additional complete copies of the publication containing your article are given below. Enter your request on the Order Form. Note that orders for additional copies must be submitted prior to publication. Orders received after publication are subject to additional handling and freight charges.
