

Michael Bergman

Vice President, New Digital Technologies, JKHD Kenwood

Mike has been in the electronics industry for more than 25 years, starting as a chip designer and progressing to embedded systems, wireless communications and wireless digital multimedia. He received his Bachelor's in Electrical Engineering at the University of California at Berkeley, and did his graduate work at the University of California at Irvine.

Prior to Kenwood, he was Vice President of Radios at Sirius Satellite Radio. He has worked for Philips, Sharp and Alps in various product lines for the computer and communications industries.

He has two patents in semiconductor design, and has participated in a number of standards bodies over the years. He is a member of the National Radio Systems Committee and co-chairs the Digital Radio Broadcast subcommittee; he chairs the Consumer Electronics Association's Special Interest Group on ATSC-M/H.
