PHIL RIZZUTO
Sept. 25, 1917 - Aug. 14, 2007

Except for a stretch in the Navy (1943-46), Phil Rizzuto was the Yankees' regular shortstop from 1941-56.

Yankees legend Rizzuto passes away at age 89

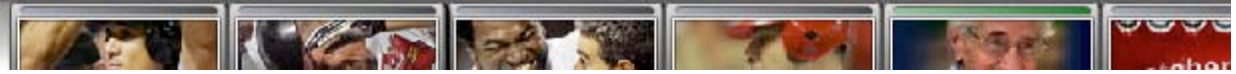

Hall of Famer **Phil Rizzuto**, a key contributor to numerous **Yankees** championship teams who followed his playing days with a legendary stay in the broadcast booth, died Tuesday. [More >](#)

9571762 – Conference Paper

[Information graphics: an untapped resource for digital libraries](#)

Authors: Carberry S (Dept. of Comput. Sci., Delaware Univ., Newark, DE, USA), Elzer S, Demir S

Proceedings of the Twenty-Ninth Annual International ACM SIGIR Conference on Research and Development in Information Retrieval, 6-11 Aug. 2006, ACM pp 581-8

Information graphics are non-pictorial graphics such as bar charts and line graphs that depict attributes of entities and relations among entities. Most information graphics appearing in popular media have a communicative goal or intended message; consequently, information graphics constitute a form of language. This paper argues that information graphics are a valuable knowledge resource that should be retrievable from a digital library and that such graphics should be taken into account when summarizing a multimodal document for subsequent indexing and retrieval. But to accomplish this, the information graphic must be understood and its message recognized. The paper presents our Bayesian system for recognizing the primary message of one kind of information graphic (simple bar charts) and discusses the potential role of an information graphic's message in indexing graphics and summarizing multimodal documents.

What does this mean for BT

- A few more links to build
- No great impact

What does this mean for the IEEE (purely my opinion and for discussion)?

- Threat
 - Nowhere near the bad press of some other publishers
 - Increase in OA publishing may restrict freedom to raise prices
- Opportunity
 - As companies like Wiley look to increase the telecoms coverage, would OA be a differentiator in this area?
