

## **Nominating Opportunity**

The opportunity is here to nominate a colleague to become an IEEE Fellow. Whether this person is from industry, government or academia, if they are a technological leader or a pioneer or visionary in their field, here is a great chance for them to become acknowledged by their peers in their own organization.

The IEEE Fellows now number over 6000 out of IEEE's total of nearly 385,000 members. IEEE Senior members or Life Senior members in good standing, who have completed five years of service in any grade of IEEE Membership and who have made an outstanding contribution to the electronic or electrical engineering profession may be nominated in one of four categories: application engineer/practitioner, educator, research engineer/scientist, or technical leader. The IEEE Fellow web site, <http://www.ieee.org/fellows>, has all the information you will need including the requirements for nominee eligibility as well as nomination instructions and all the forms. The nomination period is presently open and will continue through 01 March 2010 for the Class of 2011.

You are strongly encouraged to use the Online Application process which is quick and easy. Once you have started the application, it can be held in Draft mode until you have completed the entire form and are ready to send the information to us. Once you have submitted the application, the electronic process will automatically send emails to your references and endorsers and provide the means for you to track their status.

The IEEE Fellow Staff is working to make your nomination process as easy and trouble free as possible and they are ready to assist with all phases of the nomination process. Should you have any question during the completion process you can email [fellows@ieee.org](mailto:fellows@ieee.org) with any questions.
