

INTERNATIONAL JOB FAIR FOR STUDENTS
July 28 at the IEEE PES General Meeting, Minneapolis

OFFERS EMPLOYERS AN IDEAL OPPORTUNITY TO TALK WITH ENGINEERS OF
THE FUTURE

OFFERS UNIVERSITY STUDENTS AN IDEAL OPPORTUNITY TO TALK WITH
POTENTIAL EMPLOYERS

The Student/Industry/Faculty Luncheon with the International Job Fair for Students is a highlight of the General Meeting. Last year's luncheon and job fair were a great success! The job fair will provide a forum for employers and students, who both share a common interest in the power and energy industry, to meet and discuss career opportunities. The luncheon and job fair will enable one-to-one conversations between company engineers and students.

It will be a simple job fair. Engineers attending the GM can certainly be their company's representatives at the luncheon and job fair! Recruiters are not required. Only literature tables will be used during the job fair itself. No free-standing booths or signage will be allowed. By sponsoring a luncheon table, your company will also be given a table in the job fair.

For more information, or to sponsor a luncheon table, contact Barry LeCerf at 913-663-1112 or BLeCerf@bullseyeinternationalgroup.com. He can provide details about the cost of sponsorship. Companies are asked to commit to sponsoring a table by July 1

Please encourage your company to participate in the luncheon and job fair! It will benefit your company and the students who will learn about exciting career opportunities in the power and energy engineering field.
