

## Doing good brings *GREAT* returns.

IEEE is committed to advancing technology for the benefit of humanity. To support this effort, IEEE Humanitarian & Philanthropic Opportunities (IEEE H&P) brings together the wide range of IEEE programs that aim to do social good.

IEEE H&P makes it easy to:

- » **Become aware** of the impact made by IEEE members and the possibilities
- » **Understand** more about our programs
- » **Discover** how you can engage through contributions of time, talent, and/or treasure
- » **Give feedback** to help us improve how we are serving the community

Together, we can leverage the strength and reach of the IEEE network to make a difference worldwide.

## IEEE H&P HIGHLIGHT: 2017 Sections Congress

The IEEE H&P Opportunities initiative officially launched during Sections Congress.

» The IEEE H&P Sections Congress report provides a summary of our success at Sections Congress—outlining our objectives and value propositions.  
[View the H&P Sections Congress report](#)

» Read details on the 10 founding programs of IEEE H&P: discover how to make the pledge that is right for you, learn about the various funding programs, and much more.

## Opportunity Spotlight

### 30 November: IEEE in 2030 Challenge

Do you have an idea that could spark real change for women in engineering, young professionals, or engineers in underserved communities? The IEEE New Initiatives Committee is accepting grant proposals for short-term projects that could change the world.

### 8 December: USAID Fellowship

IEEE-USA is seeking members interested in serving as advisors to the U.S. Agency for International Development (USAID). The fellowship offers an opportunity to provide technical expertise to USAID, while learning about and contributing to the foreign policy process.

TALENT

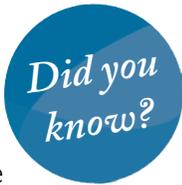

TREASURE

**Make an impact by helping us to expand our reach!**

Forward this email and newsletter to your network and encourage your colleagues to [join our mailing list](#).

## Resource Spotlight

Did you know that IEEE is a founding organization of Engineering for Change (E4C)—an online platform and community of innovators working to solve global development problems?

## Volunteer Spotlight

Meher Bnoui was the IEEE H&P Sections Congress MVP—he was there before the hall opened to set up and after the final tear down, always willing to help. Bnoui also volunteers for IEEE SIGHT Tunisia and 3I.

"I strongly believe that gathering 10 different initiatives under the wing of IEEE H&P will further highlight the focus of IEEE on humanitarian causes. Incorporating humanitarian activities within the student branches...will allow student members to work actively on an endeavor that will continue after they graduate. I am going to devise a plan for my student branch and if it works, we can replicate it on the section, regional, and world level."
