IEEE Press Series on RF and Microwave Technology

Aims and Scope of the Series

Wireless technology has become a world-wide game changer. It has redefined how we and machines interact in ways unimaginable a few years ago. The IEEE Press Series on RF and Microwave Technology spans the latest development in this area. While integrating established practices with emerging developments, the series encompasses devices, and enabling technology over the wide span of activity. This series will be of interest to students, practicing engineers and anyone interested in how this world-changing technology is evolving.

Titles in this Series

Please follow link for a list of books in this series.

Series Editor

George Kizer
Television, Inc.
georgekizer@gmail.com

George is an independent telecommunications consultant. His authored two microwave books and contributed to another. He is President, National Spectrum Management Association, Chairman, TIA TR-45 Working Group for Microwave Systems and former Chairman, TIA Fixed Point-to-Point Microwave Section. Previously he served as system engineer, program manager and product manager for microwave products for Rockwell International, Alcatel and Alcatel Lucent.
